

STARGIRLS+ MIDWEST

Join high school girls and other underrepresented genders for a FREE Astronomy Day Camp, hosted by the International Centre for Radio Astronomy Research (ICRAR) and the SKA Observatory (SKAO).

Meet and talk with women who have made their careers in astrophysics, engineering and data science.

Use research-grade telescopes to take and process your own deep space images and take part in a night time stargazing event with friends and family.

Learn about the SKAO's SKA-Low telescope, and other radio telescopes being built and used on nearby Wajarri Yamaji Country.

Where: Geraldton Universities Centre,
33 Onslow Street, Geraldton

When: 25-26 February 2025, 8.30am – 4.00pm.

Lunch will be provided. Participants will need to organise their own transport to and from the venue each day.

ARE YOU INTERESTED IN
ASTRONOMY, ENGINEERING OR
DATA SCIENCE AS A CAREER PATH?

How to apply

To apply scan the QR code, or visit icrar.org/stargirls-midwest and complete the application form.

Students will need a letter from their teacher to participate as the program runs during school hours

Applications close February 14th. Positions are limited so we encourage you to apply early!
